

Accessories

LOBO Tool Tray

The LOBO Tool Tray can be fitted to any LOBO round tube, it is ideal for small tools and has a load capacity of 10kg.

Tool Tray

Vice Attachment

The LOBO Vice attachment fits onto the top clamps of a LOBO Trestle leg. It can be turned to position the vice jaws on top or side ways to suit.

Vice Attachment

LOBO Gate

The LOBO Gate is a brand new product from LOBO Systems that adds safety to your existing LOBO Tower System.

It can be attached to the vertical side using Lobands, to provide a self closing gate. A side-stop is then attached to prevent the gate from opening outwards, reducing the risk of accidents due to falling.

It is reversible and simply attaches using three Loband couplers.

Two of the Lobands are used to fit the gate and the third Loband is used to attached the side stop.

Gate
