

Product Application – Lifting Slider Beam

LOBO Systems provides easy to attach lifting slider beams in a range of lengths.

The beams are fitted to standard LOBO components or integrated into a LOBO System with ease.

This is all done without the need for any tools and yet can be flat packed for transport or storage.

Quick to assemble, they can be used for many industrial applications to assist in maintenance of pumps, gear boxes, motors and many other machines.

LOBO beams can be positioned within a LOBO structure to facilitate limitless applications.

- ✓ Beams are rated and certified with a Safe Working Load (SWL) of 500Kg/1100 lbs maximum.
- ✓ LOBO Slider Beams are designed to fully integrate with the LOBO System or can be configured to be standalone.
- ✓ Five lengths are available 1.2m, 1.8m, 2.4m, 3.0m and 3.6m all rated at 500Kg/1100 lbs.
